SPECIAL EXPERTISE ON SEA AND LAND

Metalliasennus

Huuhka OY

SHIP INTERIORS | CONSTRUCTION | GLASS STRUCTURES

# Multi-skilled and

**1987**

*Pertti Huuhka set up a 'one-man company' and started installing fire doors at Wärtsilä Perno shipyard.*

**1990**

*Leo Valto joined the Company as a partner in the early 1990s. Shipyards began to acquire large sub-contracted furnishing areas. Metalliasennus Huuhka is one of the industry's first turn key suppliers and earns the trust of the shipyards quickly.*

**1997**

*The business group is growing. Pocadel Oy starts producing fire rated glass walls and doors for cruisers. The aluminum frame products are a huge success globally.*

**2000**

*Metalliasennus Huuhka and Pocadel move to new premises in Sauvo, between Turku and Helsinki. At the same time a decade of steady growth begins. At the end of the decade the business group's turnover is over 10 million EUR. Metalliasennus Huuhka builds its first land-based sites.*

**2012**

*The business group receives a third member when Rakennus Huuhka begins operations. This creates a solid foundation for the steady growth of the marine and land-based construction.*

**25**  
YEARS

Metalliasennus Huuhka Oy Pocadel Oy and Rakennus Huuhka Oy form a successful business group, whose roots extend back to 1987. The business has expanded from a shipyard container into a stable conglomerate.

Our company has been developed and expanded determinedly since the beginning while keeping our feet on the ground. Our values are based on down-to-earth operations, quality and respect for the environment.

Today, our customers know us as a reliable, competent and professional partner both in the shipyards as construction sites. Our strongest expertise lies in the overall management of large projects with material deliveries and installation. Our own metal, woodworking and glass construction makes our operations flexible. Our skilled network comprises a large number of material suppliers and specialists in different fields e.g. designers and class welders.

reliable partner

*Individual solutions are produced from premium materials.*

## Pioneer in ship interiors

During the past 25 years we have worked on tens of thousands of square meters in restaurant facilities, bars, libraries, shopping areas, casinos and other public spaces in luxury cruise ships.

### **Comprehensive management**

The ship interior delivery includes everything from design to material procurement and implementation. We manufacture the fittings and other interior modules in our factory to be as complete as possible, which speeds up the installation work onboard. We use a wide range of materials. We manufacture our furniture by combining different types of wood, stone, glass and metal. We utilise our wide network of expertise in the manufacturing and assembly processes.

We also provide, among other things, furniture, stairs and ceiling modules for cruise ships undergoing renovation around the world.

# Heading for land

A growing part of our business is the demanding sub-contracting work of the construction sector. We have provided furniture for libraries, offices and e.g. to the Helsinki Music Centre. In addition, we have supplied steel and glass structures, staircases, and a variety of interior structures as subcontractors for construction companies.

We develop our business continuously, so that we can meet the future challenges of the most demanding building projects. We adhere to the ISO 9001 quality system in all our activities. For welding we comply with the requirements of ISO 3832-2.

One of our most significant building projects is the Sauvo library that we renovated in an old dairy as turn key project.

***Professionalism and quality for construction sites.***

Rakennus Huuhka was established in 2012 and it continues the land-based construction activities started by Metalliasennus Huuhka. Our solid project know-how enables to control the project costs and the project will be completed on time.

All our key personnel have extensive experience in the construction industry. We also utilise our sister companies' diverse expertise: for example, we utilise the modular construction skills acquired from ship interior design projects.

#### **Contract work**

We build and refurbish e.g. different types of premises and commercial buildings. Our diverse expertise is highlighted in the turnkey deliveries, which we can deliver starting from the earth-moving work.

#### **Own production**

In our production we focus on building high-quality, unique terraced and semi-detached houses and holiday homes. We also have our own plots: building sites for residential buildings can be found, for example in Kustavi and for holiday homes in Tahko.

*We deliver the projects by respecting the client and the environment.*

SAUVON KUNTA

## Rakentaisitko Sauvoon?

Tiesitkö, että Sauvon kunnalla on tarjota sinulle ja perheellesi yli 70 omakotitonttia viideltä eri asuntoalueelta, alle puolen tunnin ajomatkan päässä Turusta ja Salosta. Tonttien hintojen suhteen on valinnanvaraa, sillä tarjolla on useita vaihtoehtoja edullisista kuivanmaan tonteista omarantaisiin merenrantatontteihin.

Tarkempia tietoja tonttitarjonnastamme saat p. (02) 474 4100 sekä internetsivuiltamme osoitteesta: [www.sauvo.fi](http://www.sauvo.fi).

*Tervetuloa tutustumaan!*

## Trendsetter in fire glass structures

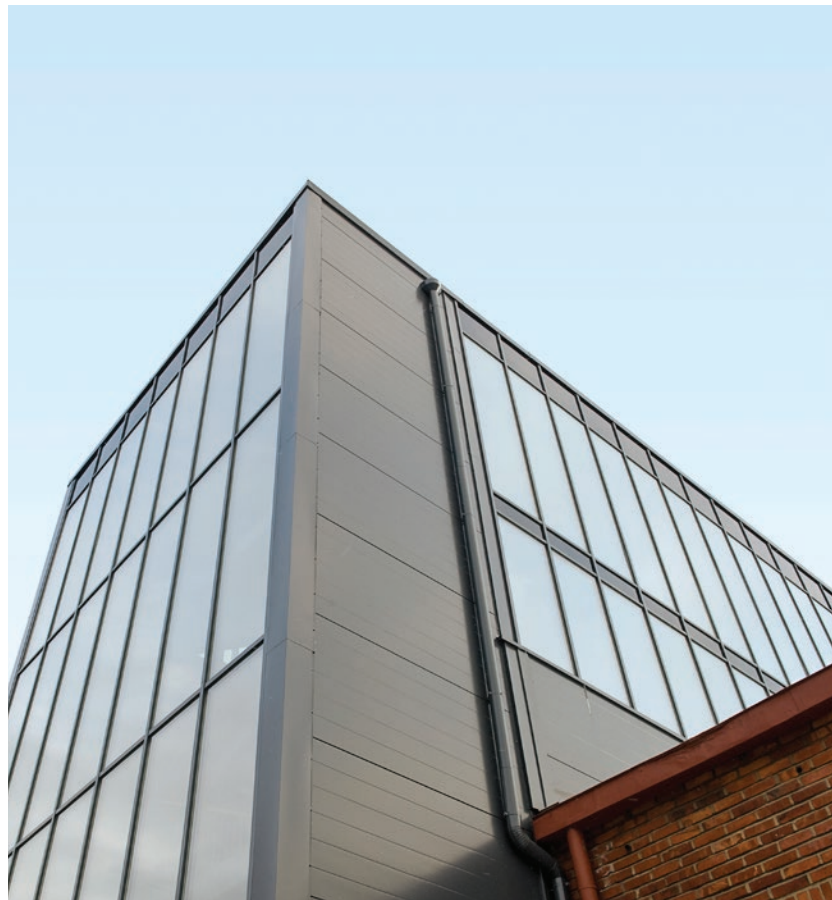

In 1997 Pocadel introduced the first aluminum profile fire doors and walls for ships. A vast majority of our products have been exported from the outset. Type approved fire resistant glass products meet the strict quality requirements of the shipbuilding industry. We are continuously developing our products and activities in order to remain at the forefront of the industry.

LOUNAIS-SUOMEN  
**Osuuspankki**

*The finished off work is our trademark.*

#### **For land and sea**

We have implemented a vast number of challenging glass structures mainly in cruise ships. In the future we are looking to grow our business especially in construction sites and the offshore industry.

#### **PVC windows**

We also manufacture durable and easy to clean PVC windows for houses, holiday homes and production facilities. The window frames are made of PVC plastic, which remains nice-looking in the challenging weather conditions for years to come.
